PROFESSIONAL EXPERIENCE

Fegno Technologies *Sep 2023 – Present*
Software Development *Kakkand, Ernakulam*

- **Led cross-functional development teams**, driving collaboration and innovation while ensuring the timely delivery of high-quality applications that met and exceeded client expectations.

- **Successfully released and maintained multiple Flutter applications**, managing the entire lifecycle from concept to deployment, resulting in consistently high user engagement and satisfaction.

- **Architected and optimized CI/CD pipelines**, revolutionizing automation for build, test, and deployment processes, which led to faster release cycles and minimized manual errors.

- **Seamlessly integrated a range of third-party services and APIs**, expanding application capabilities and delivering enhanced user experiences through robust external connections.

SciWiz Technologies *Jan 2022 – Feb 2023*
Software Development *Vazhakkala, Ernakulam*

- **Executed flawless pixel-perfect UI conversions** from intricate design mockups to fully functional Flutter applications, achieving superior visual fidelity and an exceptional user experience.

- **Engineered a comprehensive suite of testing strategies**, including unit, integration, and widget testing, to ensure reliable, high-quality code and deliver robust, bug-free applications.

- **Mentored and guided junior developers**, fostering a collaborative learning environment that accelerated skill development and improved overall team performance.

Freelancing *Jun 2021 – Present*
Software Development

- **Cultivated strong client relationships through clear and effective communication**, translating business needs into technical solutions and providing ongoing support to ensure project alignment and satisfaction.

- **Pioneered and contributed to high-impact open-source projects**, tackling complex business logic and technical challenges, while actively engaging with the Flutter community to drive innovation and collaboration.

- **Drove product vision and strategy**, aligning development efforts with business goals to create impactful applications that solved real-world problems and delighted users.

PROJECTS

majarat www.majarat.ae
Flutter, MVC architecture, Getx
An eCommerce application developed using the MVC architecture and GetX state management. This contract-based project involved creating a seamless and intuitive shopping experience, optimizing performance, and ensuring robust state management throughout the app.

Feg CLI pub.dev/packages/feg_cli
Dart, Mason, Bricks
A command-line interface package designed to generate ready-made project templates efficiently. Built with Dart, Mason, and Bricks, this tool streamlines the setup process for new projects, allowing developers to quickly scaffold and customize their applications.

Shopprix Play Store
Flutter, Bloc, Clean Architecture, Python, Postgress, Redis
An eCommerce application developed for Fegno Technologies. The project focused on creating a scalable, maintainable codebase with a strong separation of concerns, ensuring a robust and efficient shopping experience for users.

EDUCATION

Bachelor of Computer Application   *Present*
Lovely Professional University   *Punjab*

SKILLS

Languages: Dart, Kotlin, Java, Swift, Java Script, Type Script, Ruby, Bash, C++, C, SQL
Technology: Flutter, Node, Git, AWS, Docker, Fastlane, Codemagic, Firebase, MongoDB, GraphQL, Selenium, Webdriver IO
Flutter Development: State Managements, CI/CD, Automations, IOT
